

CCR No. 96-0431B	Logged Date 5/9/96	Rev. --	Request Type CCR
Priority Routine <input type="checkbox"/> Urgent <input type="checkbox"/> Emergency <input checked="" type="checkbox"/>		Affected Release None	Change Class II
Title Shipping of a DEC 7000 machine from NASA (Goddard) to Hughes for hosting NRA/CAN Testbed prototypes			
Documents Affected		Source Nos (RID, NCR, etc.) or Tech Reference	
RTM Change <input type="checkbox"/> Start New Baseline <input type="checkbox"/>			
Problem We are currently hosting a prototype on the NRA/CAN testbed that requires to run on a DEC (Digital Unix v3.2)			
Proposed Solution We have been informed by Karen Moe of NASA that there is an extra DEC 7000 machine (Digital Unix v3.2) that we can use in place of et3ws5 (DEC Alpha 600 on evaluation in the testbed) for hosting the prototype on the NRA/CAN testbed. The agreement on shipping the DEC 7000 machine has been settled with Karen Moe. The machine will stay in the testbed for one year's time. We need HTSC assistance in networking the machine to the FDDI Hub NRA-ISS-3 of the testbed. The hardware specifications of the DEC 7000 is as follows: Power: US 120V/50 A peak, 30 A rated (50-60 Hz, 3-phase) 4-wire N-GND Physical Dimension: 67 in. high x 31.5 in wide x 34.4 in. deep Weight: 900 lbs without battery, 1200 lbs with battery Heat Dissipation: fully configured system, 17700 Btu/hr, 5200 W 128 MB RAM, 600 MB CD-ROM, 6 GB HD, XMI SCSI Adapter 200 MHz Processing Speed, FDDI board After speaking with Jack Eisenstein, we have worked out a location to put the DEC 7000. It will be put in the spot where the DEC Server 8200 is sitting in the Server Room. There are two DEC machines on loan from DEC, DEC 8200 in Server Room and DEC 600 in Room 1028. These two machines will be shipped back to DEC at the same time when the DEC 7000 is installed. EDS people have been contacted and will start coordinating the shipping process.
